PROFESSIONAL SUMMARY

A highly motivated and experienced Android Developer with a strong foundation in Kotlin, Java, and MVVM architecture, specializing in creating high-performance and scalable mobile applications. Possessing proficiency in Jetpack components, networking, database management, and dependency injection, I am adept at collaborating with product managers, designers, and developers to deliver robust and user-friendly solutions.

SKILLS

Kotlin, Java, MVVM, Jetpack, Retrofit, OkHttp, Room Database, Dagger/Hilt, LiveData, ViewModel, Navigation, Networking, Memory Management, Code Review, Mentoring, Android Studio, Android SDK, XML layouts, Jetpack Compose, Firebase, Dagger, Hilt

EXPERIENCE - TAILORED FOR ANDROID DEVELOPER AT

Android Developer - Nova Retail Pvt Ltd (March 2020 - Present)

- Designed and maintained high-performance Android applications in Kotlin and Java utilizing MVVM architecture, leveraging Jetpack components like LiveData, ViewModel, and Navigation, ensuring optimal performance and user experience.
- Implemented robust networking solutions using Retrofit and OkHttp, effectively utilizing Room Database for local storage, and Dagger/Hilt for dependency injection and advanced code management.
- Optimized app performance and memory usage through careful coding practices and strategic use of Room Database and Dagger/Hilt, contributing to a more efficient and stable application.
- Collaborated with product managers and designers to translate requirements into functional and well-documented mobile applications.
- Wrote clean, well-documented, and testable code, adhering to established coding standards and best practices.
- Conducted code reviews and mentored junior developers, fostering a collaborative and efficient development environment.
- Troubleshooted and debugged production issues, quickly resolving and minimizing impact on user experience.

EDUCATION

B.Sc Computer Science - Bangalore University (2016)

CERTIFICATIONS

- Cert1

LANGUAGES

Kotlin, Java
